

## REMEMBERING GOD'S NUDGINGS

It is not just important to know God's nudging but it is important to put a marker down when we experience His nudging. As we remember His voice, we begin to sense the hand of God anew and afresh not only each day but all throughout the day.

Just yesterday, I experienced a nudging of God when He spoke to me through someone. We were working around the church, when all of a sudden this friend said to me; they aren't going to always going to have us. While that is always the truth in any situation, God took those words; they aren't always going to have us to speak to my soul in a powerful way. It was a nudging from the Lord to let me know what He is up to. When you hear the Lord nudge your heart, it is impossible to forget what he says. While you can try, the voice of God will not let you forget. His voice and His words ring in your heart over and over again, when you have heard the nudging of God. You have literally heard the voice of the living God. In a real sense you have just encountered Almighty God.
